FAIR VALUE EQUATION OF NOTE

$$\left(\left(\text{AVG Price [USD]} * [\text{USD/SEK}] \right) - \text{Fee} \right) * 0.005 = \text{FAIR VALUE}$$

$$\left(\frac{\begin{matrix} \text{** ITBIT [BTC/ USD] Bitstamp} \\ \text{[BTC/ USD] Coinbase [BTC/} \\ \text{USD]} \end{matrix} + }{3} \right) \left(\frac{\text{Days Since Purchase} * (0.025 / 360) \text{ Avg} \\ \text{BTC Price Since Purchase}}{\times} \right)$$

***Reference Price: BTC/USD is traded on a large number of bitcoin exchanges and the average price of the 3 most liquid exchanges provides the underlying reference price for the product as specified in the prospectus. This list of exchanges can vary based on volume.*

KEY FACTS ABOUT THE PRODUCT

- ▶ In May 2015, Bitcoin Tracker One became the first bitcoin-based security available on a regulated exchange when it listed on Nasdaq OMX in Stockholm.
- ▶ The product is traded during normal opening hours: Monday to Friday, 9:00 to 17:25 (CET).
- ▶ XBT Provider's prospectus is approved by the Swedish Financial Supervisory Authority (FSA) and the products are listed on Nasdaq in Stockholm.
- ▶ Bitcoin Tracker One is traded in the same manner as any share or instrument listed on Nasdaq exchange in Stockholm. It is accessible via any global securities electronic trading platform with access to Nasdaq Stockholm.
- ▶ To invest, you need an account, which is obtained through your bank, advisor or online broker.
- ▶ To hedge its exposure under the certificates, XBT Provider (the Issuer) enters into an intra-group collateral management arrangement with an affiliate (CoinShares Capital Markets), whereby the Issuer provides cash raised from the issuance of the Certificate to the CoinShares Capital Markets in exchange for a contractual promise to pay the settlement amount of the note (the original purchase price plus or minus any price movements in the underlying crypto currency less the relevant fee). To hedge its exposure under that contract, CoinShares Capital Markets purchases the relevant crypto currency on a 1:1 basis, in both physical form and using derivative contracts. The product does not distribute dividends. Investors can purchase and sell certificates on the stock market (the so called secondary market) during normal exchange traded hours set and operated by the exchanges.
- ▶ Bitcoin Tracker One is available in Swedish Krona and consequently, there will be a foreign exchange rate exposure between USD and the relevant currency which may impact (positively or negatively) the market value and final return from the product.
